

Aqta' Fjura u Ibni Kamra

Aqta' fjura u ibni kamra;
Aqla' sigra u tella' dar;
Imxi metru, ibni villa;
Tinkwetax ... dak li sar sar..

A low-angle, upward-looking photograph of a tall skyscraper with a glass facade, surrounded by other buildings in a city skyline. The sky is blue with light clouds.

Mur pass iehor u ibni torri;
Itla' fl-għoli, miss is-šhab;
Tinkwetax jekk šhaqt l-għelieqi,
Kulma ħlejt kien naqra trab.

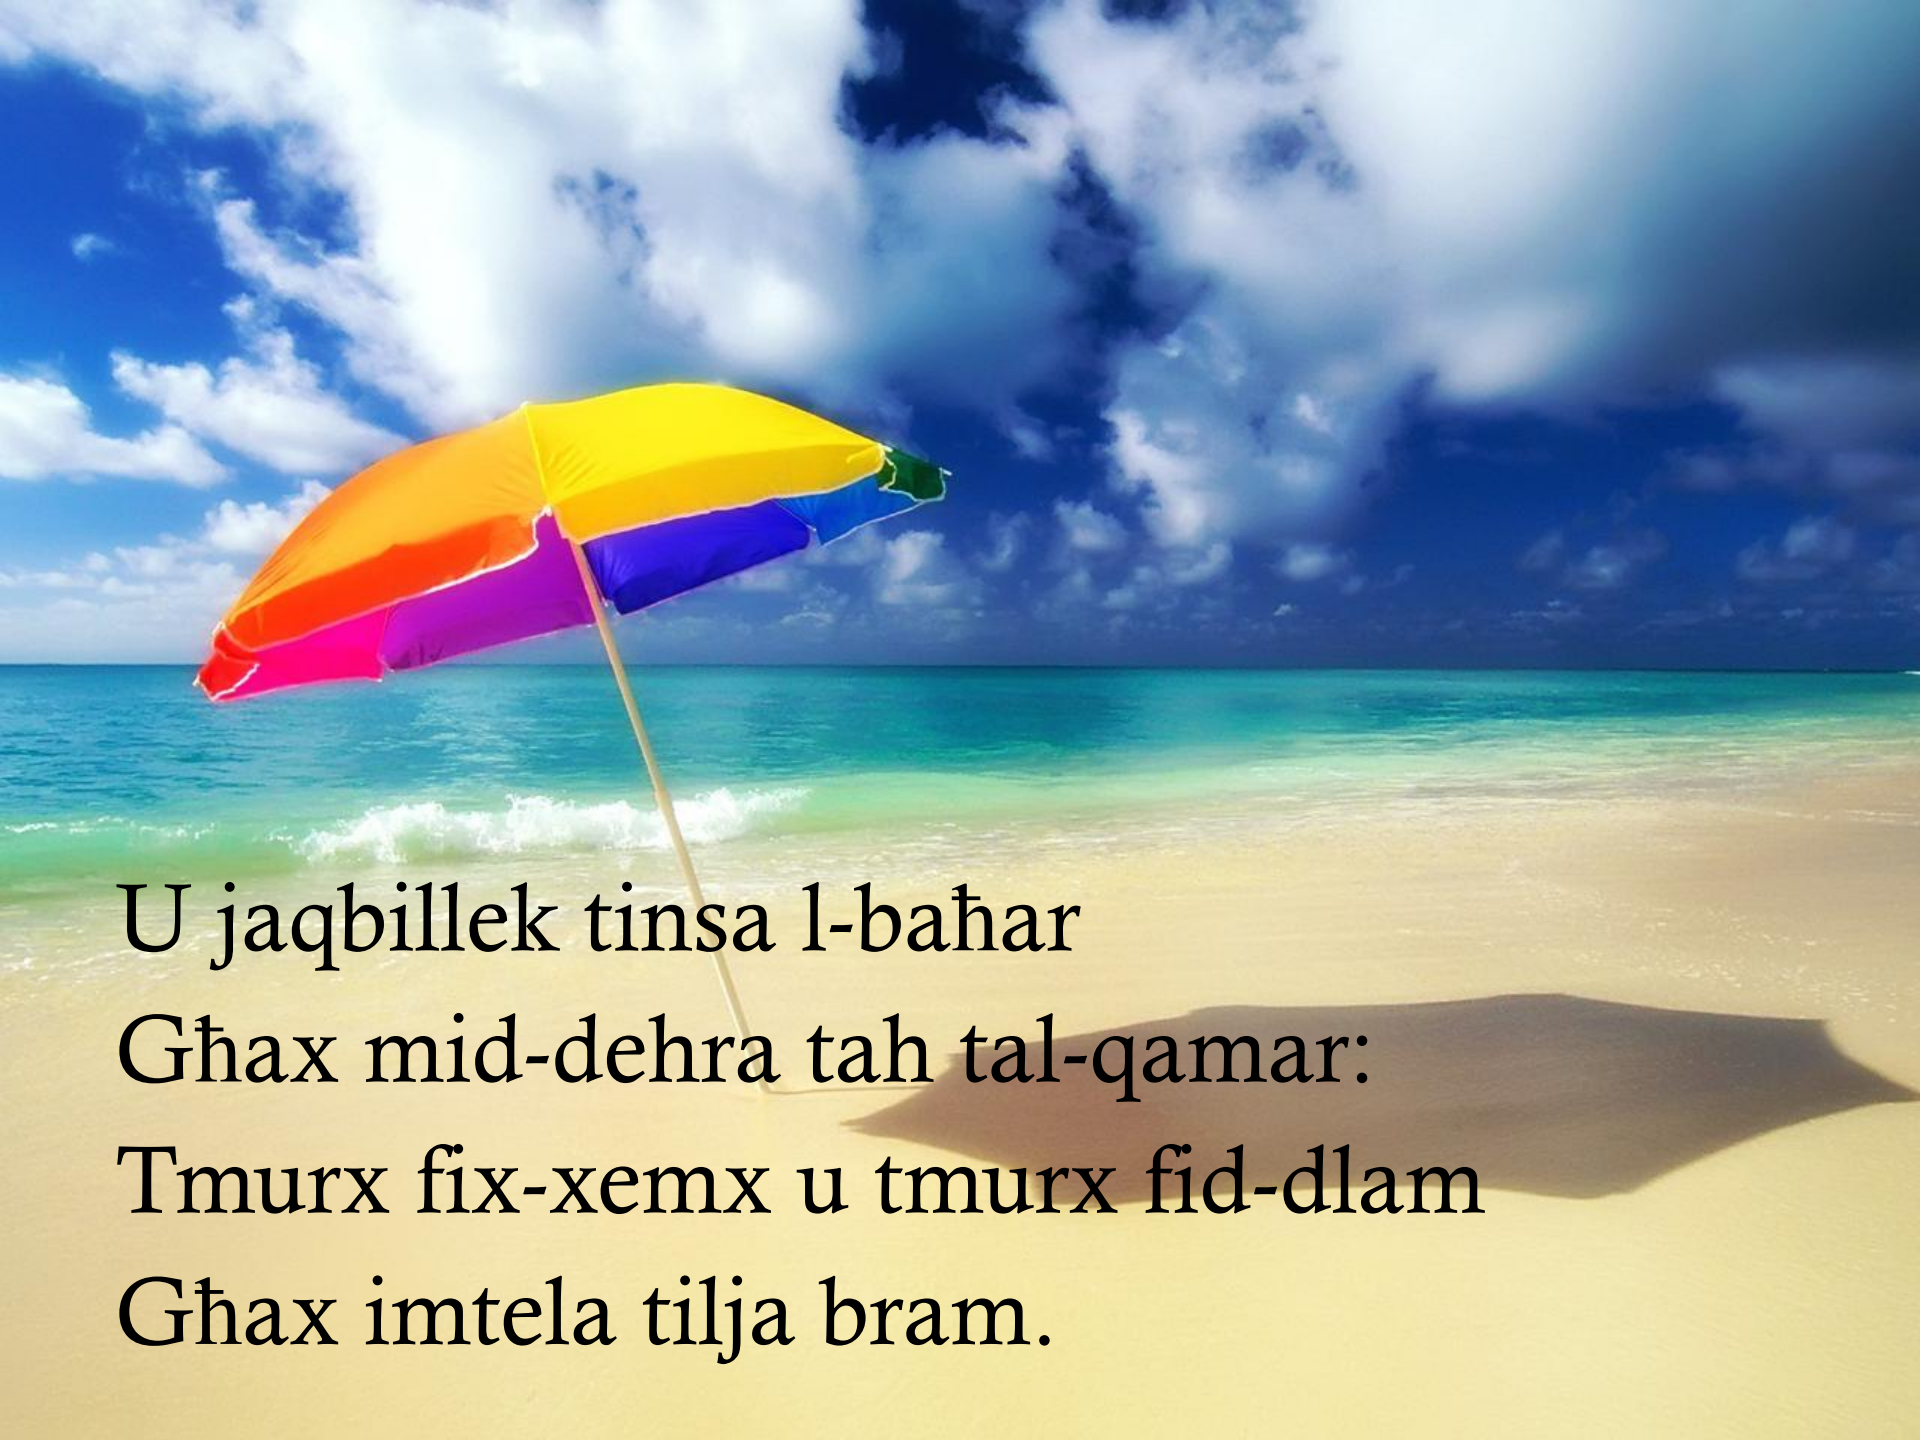

Dur mal-kosta, fittex rokna;
Arma *boathouse* fuq il-blat;
Anki 'l baħar aghmel tiegħek
U ħallik mill-pixxispad.

Taghtix kas li l-baħar tiela'
Itla' fl-gholi anki int:
Bnejt it-torri, itla' fuqu,
Ibda gawdi dak li ħdimt.

Issa isma' x'qed jghidulek:
Hdejn il-baħar tmurx fit-tul.
Hemm ftit metri hdejn il-villa,
Li kont minnek nibni *pool*.

U jaqbillek tinsa l-baħar
Għax mid-dehra tah tal-qamar:
Tmurx fix-xemx u tmurx fid-dlam
Għax imtela tilja bram.

Aqta' fjura u ibni kamra.
Jiena nifhem: 'tini widen;
Meta mbagħad tkun lest minn kollox,
Hu nifs qawwi u mur indifen.
